

## 2016 Heart Failure & Muscle Metabolism DPU Chemistry Co-Op positions

The Heart Failure and Muscle Metabolism Discovery Performance Units are offering full-time, 12 month co-op positions located at our Upper Merion campus in Pennsylvania.

The primary focus of the placement will be the chemical synthesis of organic molecules to produce novel drug candidates, however as a member of our multi-disciplinary team you will also gain insight into the broader aspects of the drug discovery process. This is an excellent opportunity to extend your skill set in preparation for securing employment post-graduation.

If you have recently graduated (within 1 year) with a Masters in Chemistry or are currently enrolled in a Ph.D. program, you are eligible to apply for this exciting program. To do so please email your resume or CV and a research summary to [tony.l.handlon@gsk.com](mailto:tony.l.handlon@gsk.com) and [edward.j.brnardic@gsk.com](mailto:edward.j.brnardic@gsk.com)
