DAIRY GENETICS INTERN JOB DESCRIPTION

ABOUT CRV: CRV is a world-leading, customer-focused cattle improvement organization that helps dairy producers build healthy, easy-to-manage, and profitable herds—helping them meet the demands of an ever-changing market and improving their quality of life.

The CRV USA office in Madison, Wisconsin was established in 2009—but the organization was formed more than 140 years ago in Holland and now serves more than 100,000 customers in 60 different countries.

POSITION: Dairy Genetics Intern

DESCRIPTION: CRV USA seeks a dynamic, self-starter to assist in analysis of dairy herd performance data to help with the promotion of CRV product offerings such as [HerdOptimizer](#).

JOB FUNCTIONS AND RESPONSIBILITIES:

- Working with herd management software programs such as DairyComp 305, PCDart, DHIPlus, track performance of CRV genetics
- Work with the CRV team and their mating program, SireMatch
- Locate and travel to herds with CRV daughters to evaluate and photograph progeny
- Assist with coordinating photo sessions and assist with cattle preparation and getting crew line-up
- Work with sales team and marketing to find, interview, and photograph customers to develop testimonials and case studies
- Assist with processes involved with HerdOptimizer, including ensuring data is flowing to and from the customer and/or labs effectively and efficiently
- Gather and analyze conception reports from Bullseye farms
- Help with genomic collection on large herds

REQUIRED QUALIFICATIONS:

- Working towards degree in Dairy Science, Genetics, Animal Agriculture, or related field
- Excellent Microsoft Excel and statistics skills
- Background in and/or knowledge of the agriculture industry
- Excellent written and verbal communications skills
- Strong attention to detail and organizational skills
- Ability to prioritize, multi-task, and meet deadlines
- Must be able to travel around the US
- Must have a reliable mode of transportation and valid driver's license
