

ZATIL AFRAH ATHAILLAH

Now:

Junior Researcher
Research Center for Chemistry
Indonesian Institute of Sciences

Email: zatil.afrah@gmail.com

Zatil started to work for Research Center for Chemistry – Indonesian Institute of Sciences in February 2015. She is a member of Food Chemistry research group. She has been involved in several research projects: analysis of bioactivity of Indonesian indigenous food, functional food development, analysis of endocrine disruptors (lead, cadmium, BPA, phtalates) in drinking water, and survey of water quality in schools. Currently, she is also preparing for application to PhD program.

Then:

Masters in Food Science &
Technology
2011-2013
Oregon State University

Zatil conducted her research in OSU Seafood Lab from 2012 to 2013 with guidance from Dr. Park. Her research topic was FILM-FORMING ABILITY OF FISH PROTEINS. The study involved preparation of thin films from surimi with different extraction methods and then continued with physicochemical characteristic analysis.
