

JACEK JACZYNSKI

Now:

Professor of Food Safety
West Virginia University

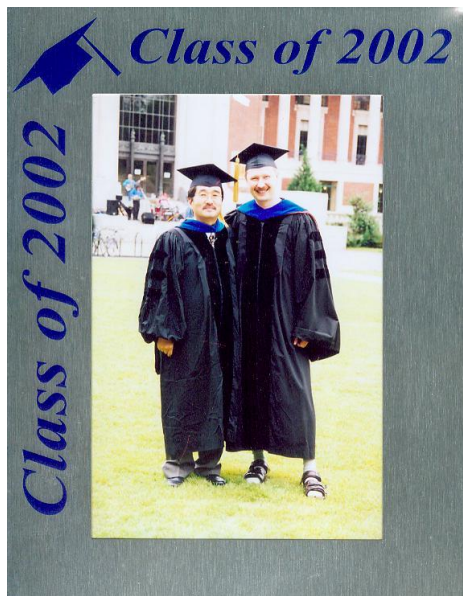

Dr. Jaczynski started as an Assistant Professor at West Virginia University (WVU) in 2002. He was tenured and promoted to Associate Professor in 2008 and to Professor in 2013. Jacek's lab at WVU works on extraction of marine lipids and proteins as well as microbial inactivation kinetics. Latest research also involves insects as a source of lipids and proteins for direct human consumption.

Then:

Doctor of Philosophy in Food
Science and Technology
1998-2002
Oregon State University

Jacek completed MS degree in Food Science and Technology in Dr. Daeschel's lab at OSU. Jacek investigated inactivation of *Listeria monocytogenes* on model food-contact surfaces. He then started his PhD program under Dr. Park's guidance in 1998. Jacek earned PhD in Dr. Park's lab in 2002. Thesis title: SURIMI SEAFOOD UNDER THERMAL/E-BEAM PROCESSING
