

JIRAWAT YONGSAWATDIGUL

Now:

Associate Professor
Head, School of Food Technology
Suranaree University of
Technology

Email: jirawat@sut.ac.th

Jirawat began working at Suranaree University of Technology in 1997 after 1-year postdoctoral duty at OSU Seafood Laboratory. For the past 20 years, he has developed a comprehensive teaching and research program directed towards biochemical changes and gelation of fish proteins. His research program has now expanded to the area of bioactive peptides derived from muscle foods. He has also worked closely with several leading food companies in Thailand. Jirawat has published 88 research articles with h-index of 26 (as of August 2018). In 2017, Jirawat received the Ajinomoto Award in recognition and dedication to the outstanding food science and technology research for Thai society development.

Then:

Ph.D. in Food Science and
Technology
1992-1996
OSU Seafood Laboratory
Oregon State University

Jirawat received Ph.D. under supervision of Dr. Jae W. Park. His thesis title was “Textural and electrical properties of Pacific whiting surimi under ohmic heating”. Publications from his Ph.D. study include:
