

# DEVIN DAESCHEL

## Now:

Microbiology Senior at OSU

After his summers with Dr. Park, Devin went on a year long study abroad to Japan. There he was able to attend Surimi School Japan hosted by Dr. Park as well as reconnect with old friends and research partners who live in Japan. Devin is now currently in his final year at OSU where he will finish his microbiology degree and pursue higher education.

## Then:

2016 and 2017 Summer Intern  
at OSU Seafood Lab in Astoria

Through the URISC (2016) and BES (2017) summer internship programs Devin worked on various surimi research projects under Dr. Park's guidance at the seafood lab in Astoria. These projects focused on texture and color values of surimi with regard to processing conditions. Devin presented his findings with a poster and is helping coauthor a paper on the research.
