

HYUNGJOO KEVIN KIM

Now:

Undergraduate student
Junior
Konkuk University, Korea

Kevin Kim worked as a student intern under Dr. Park during 2017-2018 at the OSU Seafood Lab. He is currently in his junior grade in his home country, Korea and planning to graduate in 2020. Although, his major is not related to seafood, during his internship program, he decided that after graduating with his undergraduate degree, he will continue to graduate school to study more about seafood.

Then:

Student Intern
OSU Seafood Lab

Kevin worked as a student intern at the OSU Seafood Lab during 2017-2018. Although Dr. Park was not formally accepting new students, Kevin was accepted as a visiting grand-student. As such, he was one of last students to be trained by Dr. Park as he plans his retirement. During the program, Kevin learned the basics of seafood and surimi. Additionally, he worked on various projects, such as inhibiting TGase and adding fish bone in surimi with help of Dr. Park and Angee Hunt. He presented his research at PFT 2018 (Girdwood, AK) as an oral presentation, winning 1st place in the student competition and at IFT 2018 (Chicago, IL) as a poster presentation.
