ArcGIS Online accounts are now created automatically when users first log into the system. New accounts will be provisioned with MyESRI access and ArcGIS Pro Licenses. To start, go to www.arcgis.com.

Click on the Sign In button in the upper right of the screen.

Then click on the Enterprise login button.
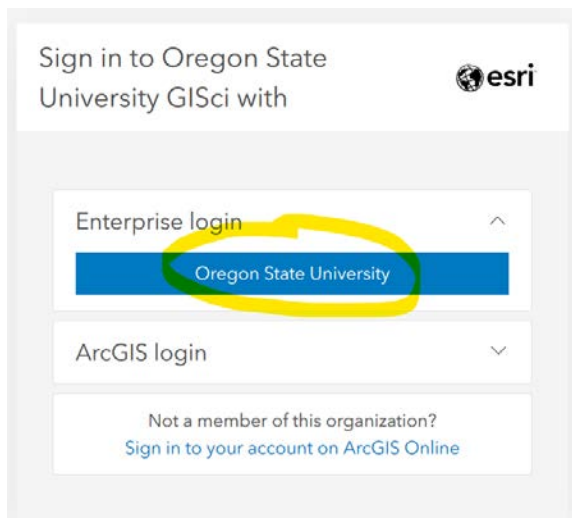

Next, enter in "OSUGISci" for the organization URL. Also click on the remember this URL so this is saved on your computer.

Click on the Oregon State University button to be redirected to an ONID login page.
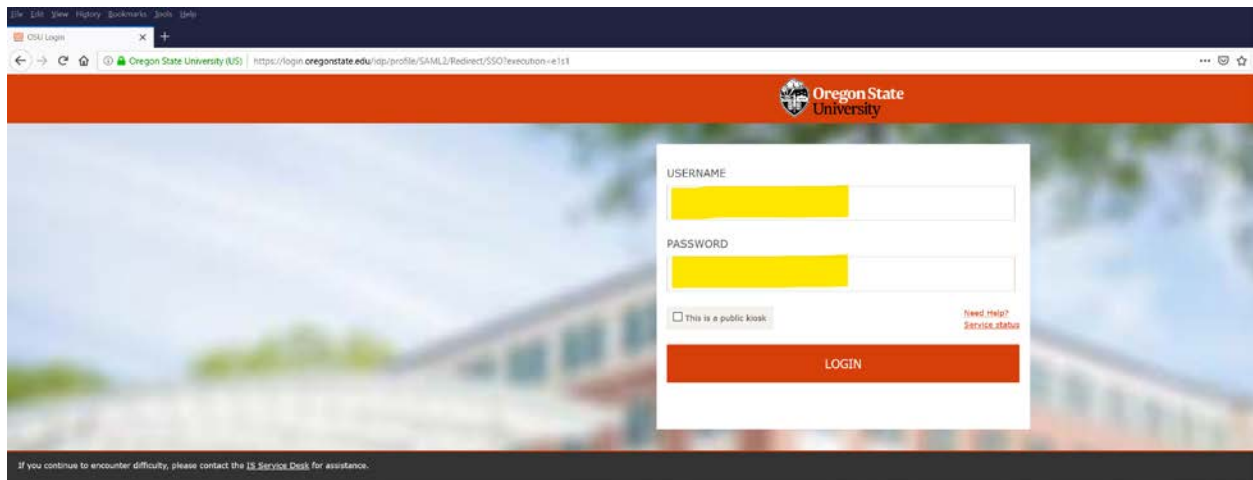

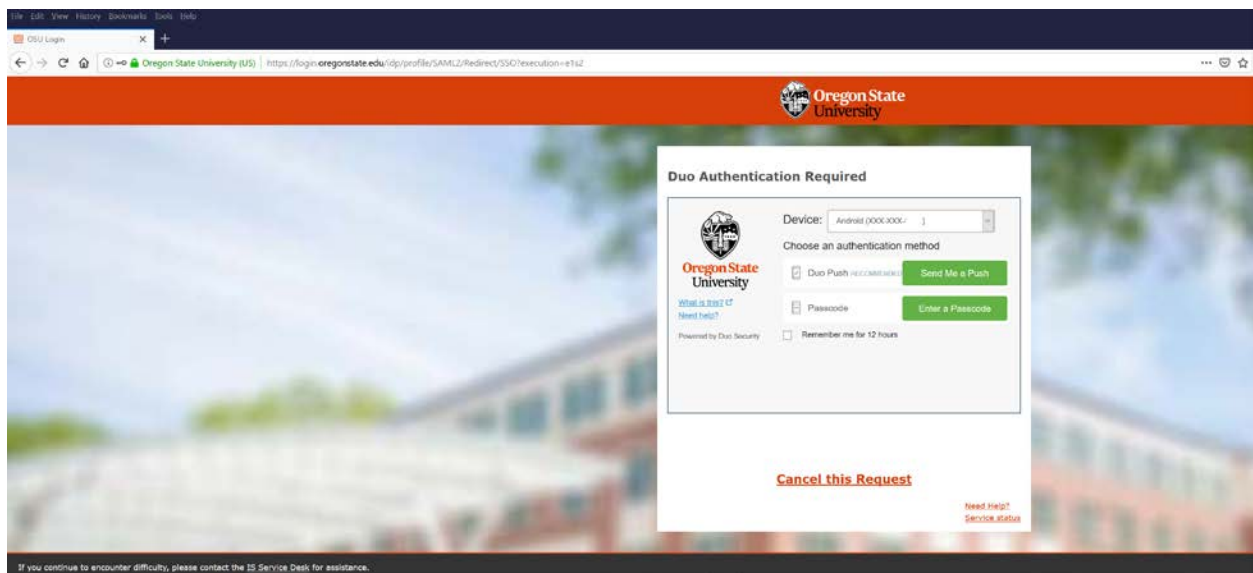

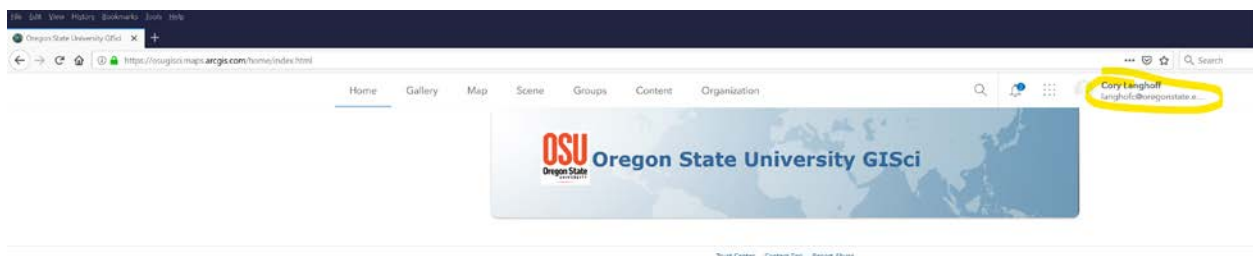

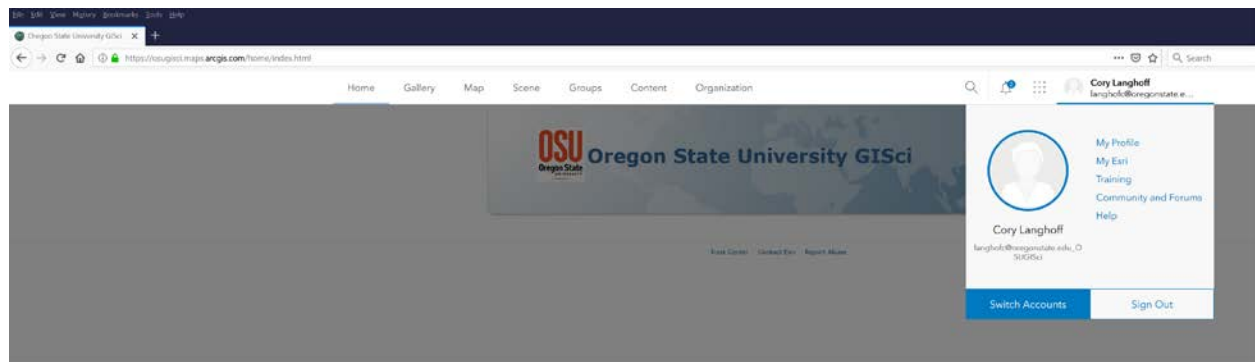

Enter your OSU ONID credentials here.

If your ONID account is DUO enabled you will be prompted for authentication.

Once logged in you can see your username in the upper right hand corner.

When you click on the link, you can see a drop-down menu that will help you navigate to MyESRI and access free training modules.

With this Enterprise Login method, you will not need to set up a separate username and password. In the future all you will need to remember is to type "OSUGISci" as the organization URL and your ONID credentials.
