

Farmer's Market Plant Clinic Checklist!

The Farmers Market requires some additional preparations and considerations for the plant clinic. Gardeners doing the clinics should coordinate with each other and the extension agent to pick up supplies prior to the Market or event. The extension staff work remotely on Fridays, making pickup difficult without prior planning.

- Table.
 - There is a table in the Plant Clinic Office or bring your own. No requirements on size, but card table/ camping table size works well.
- Chair
 - Folding chairs are in the Plant Clinic Office or bring your own camp/folding chair.
- Tent (NOT RECOMMENDED)
 - The Farmers Market usually puts us in the shade. If you would like a tent as well it is in the basement at the MG office. Tents require weights, which are also in the basement.
- Materials
 - The clear case in the office has a variety of plant clinic forms and handouts needed for the clinic. It also contains free seeds to give away, bungee cords for the sign (with the case) and the tablet for the PNW handbooks.
 - The briefcase with the PNW handbooks is no longer needed. These books are out of date, and all answers must be verified with the online version of the PNW.
 - The password for the tablet is 1234, connect to The Dalles public Wi-Fi.

If you plan, you can get the supplies from the last Plant Clinic group as long as there are enough handouts. The tablet charges with a USB C cord and has a very long battery life. (Multiple months)

Please reach out with any questions.
