

GREY WOLVES

Canis Lupis

Wolves are one of the most mysterious creatures found in Yellowstone. They like to be with their pack and play hide and seek, except it's almost impossible to find them. You need to be in the right place at the right time to see these amazing animals.

Fun facts:

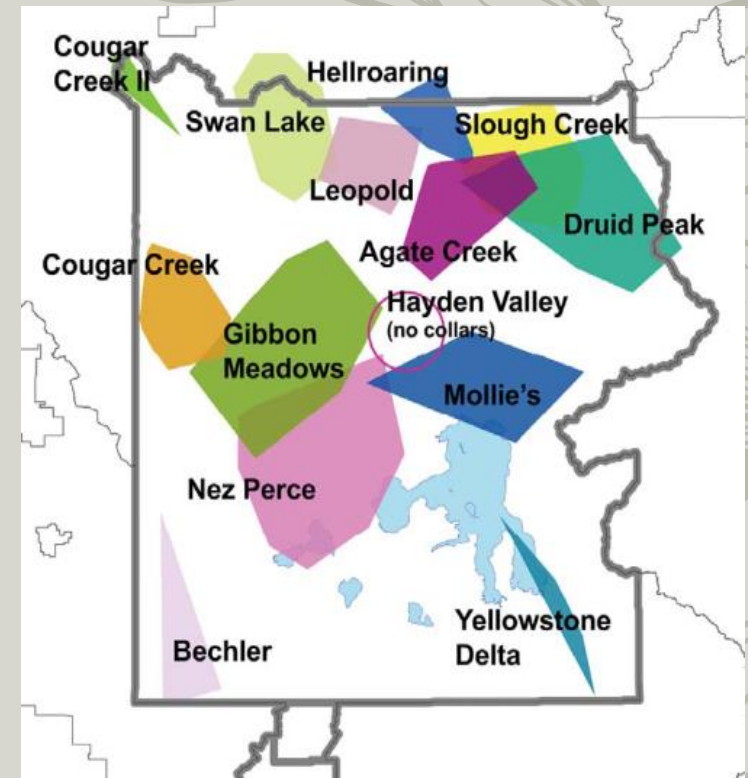

- Grey wolves come in many different colors; black, grey, brown
- They can be found all over Yellowstone
- Females can weigh 70 – 80 lbs while males are 95 – 100 lbs.
- Their diet consist of elk, deer, and other small mammals

Facing threats in Yellowstone:

- The packs face government predator control
- Farmers have been known to kill over livestock deaths.
- People think they are killers

Benefits of wolves:

- Regulate animal population
- Allows for native plant growth
- Allows other species to return to the area.
