# Notification of Operations

HELP SIGN IN

## Welcome to FERNs

Forest Activity Electronic Reporting and Notification System  
Oregon Department of Forestry

FERNs will allow you to Notify the Oregon Department of Forestry prior to conducting an operation or forest practice. You must file a **Notification of Operation** at least 15 days before starting the operation. FERNs will also allow you to notify the Oregon Department of Revenue of the intent to harvest timber.  
[Learn More](#)

FERNs will allow you to apply for a **Permit to use Fire or Power-Driven Machinery (PDM)**. You must obtain this permit for any operation that uses fire or power driven machinery.  
[Learn More](#)

FERNs will allow you to **Subscribe** to receive notifications of operations and information alerts.

 Oregon Plan for Salmon and Watersheds

 Industrial Fire Precaution Level and Regulated Use Closures

Did anyone get a chance to flip through the Oregon Forest Protection Laws: An Illustrated Manual?

Questions and experiences to share?

# Protects all waters of the state.

Images provided by: Oregon Forest Resources Institute

# Wet-weather hauling

Images provided by: Oregon Forest Resources Institute

# Requires wildlife trees, snags and down logs?

Protected areas under the log are used as nesting cover by grouse and as hiding cover by rabbits and hares.

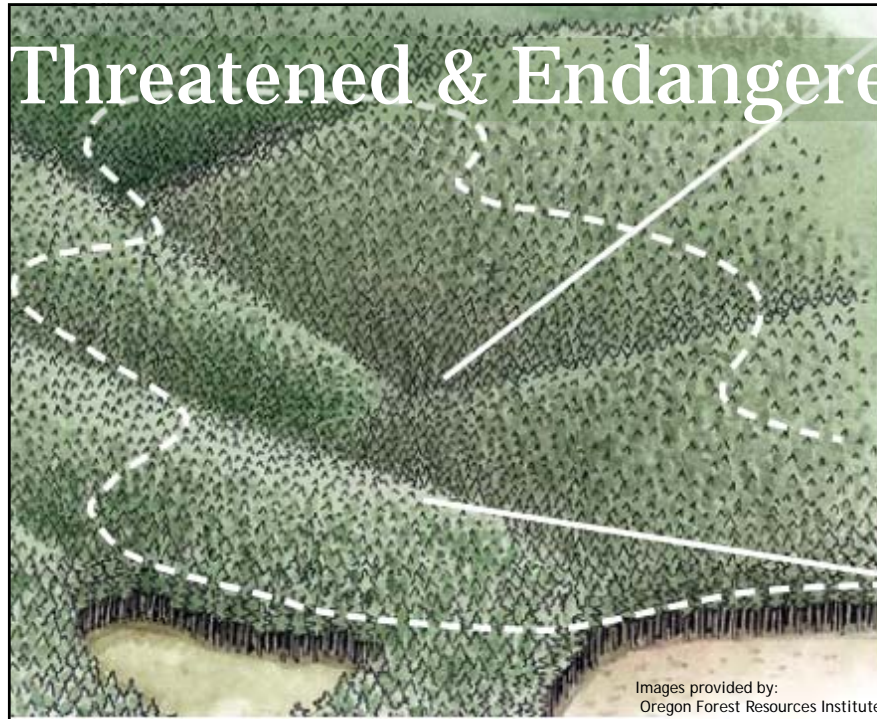

When the bark loosens, there is hiding cover for tree frogs and amphibians. The trunk is a food source for woodpeckers, particularly pileated woodpeckers.

Small mammals burrow into the interior as the log softens. Bears, raccoons and skunks feed on insects.
