LEARNING OBJECTIVES
After studying Judging the Scientific Quality of Applied Lighting Research, and after we discuss sections that are either unclear or difficult, you should be better equipped to read and evaluate peer-reviewed scientific articles, especially those about lighting.

ASSIGNMENT
In preparation for discussion at our next class meeting, read this article:

To prepare for the discussion (where active involvement is expected!), please prepare five questions (or comments) about the article. Did parts of the article use unfamiliar language or concepts? What about the article was unclear, or is still fuzzy? The questions that you raise will inform how we structure our discussion.

DELIVERABLES
Upload your questions to Canvas.
