

Protect Your Data

Password Edition

DO NOT
use terrible passwords

most common passwords:

password

123456

123456789

guest

qwerty

12345678

111111

12345

from nordpass.com

Lists of known passwords
from hacked databases
are fed into
password-breaking tools.

**DO NOT
reuse passwords**

If a foe discovers your password to one account, they'll try **it** on other accounts.

↓
**AND
variations
of it**

**haveibeenpwned.com
to see if your logins
or passwords are
compromised**

DO use long passwords

Time to crack
your password

length numbers letters

4	INSTANTLY	
6		minutes
8	seconds	hours
10	hours	months
12	days	years 

from hivesystems.io

DO

use a password manager

to create & store

strong, long, random
passwords

that you don't type in
yourself

passwords like:

tgp6WbbYj%2K)K@@5TD3

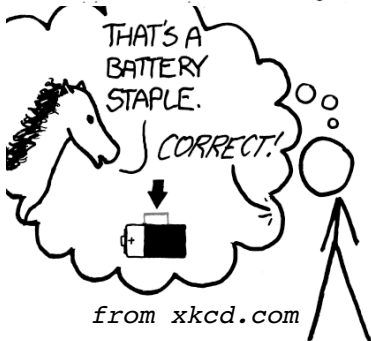

+1 for the built-in password
manager in your browser

DO
use passphrases

To protect your password manager and unlock devices.

Random words make an easy-to-remember phrase. Make one on dicepass.org

correct horse battery staple

DO
use two-factor
authentication

via text or token or app
